

1 Goals for the Past Week

The following is a list of our goals for the past week, as well as descriptions of their completion and/or progress:

1. **Get ready for our Concept Development design review**

As of today, we've submitted the initial drafts of our concept development artifacts, and are now in the process of preparing our presentation for Friday. We're attaching our completed initial draft for your review.

2 Goals for the Coming Week

The following is a list of our goals for the coming week, as well as details about how we plan to accomplish them:

1. **Finish the concept development stage**

If necessary, we will make revisions to our artifacts and submit them within seven days. After that, we will be able to focus exclusively on progress for the competition for a couple of months, which is exciting.

2. **Get last year's control and interop schemes up and running in simulation**

- Be able to launch the entire path planning/groundstation system in simulation, and send waypoints to the plane
- Get the Interop server serving up mock missions in simulation

3. **Run tests in a wind tunnel to evaluate our airspeed and barometer sensors**

Please send us any feedback with regards to the progress we've made, as well as our plans for the coming week.
